About Me

UI/UX Designer & Frontend Developer experienced in creating clean and user-friendly web applications. Worked on online test systems, IoT-based apps, mess token systems, attendance tracking, e-commerce, and travel sites. Skilled in **wireframing, prototyping, UI design (Figma)**, and **front-end development** using **HTML, CSS, JavaScript, PHP**, and **SQL**. Integrate user interface design with frontend development to create responsive, intuitive digital experiences that directly address user needs.

Work Experience

Email Marketing Trainee - Webberax

OCT2025 - NOV2025

Gained hands-on experience in email marketing by analyzing deliverability, optimizing domain/IP reputation, testing content, and improving inbox placement.

User Experience Design Intern - POSTULATE

JUL2024-AUG2024

Designed and prototyped UI's for e-commerce, car rental, and e-learning platforms, using **user research** and **competitive analysis** to enhance usability and create engaging experiences.

Frontend Web Development Intern - Devskillhub MAY2024-JUL2024

Developed responsive web interfaces for e-commerce, car rental, and e-learning platforms using **HTML, CSS**, and **JavaScript**, collaborating with UI/UX designers to turn mockups into functional, visually appealing pages.

User Experience Design Intern - Skillforge

MAY2024-JUN2024

Designed intuitive web interfaces, enhancing **navigation, usability**, and **layouts** for both desktop and mobile platforms.

Projects

ONLINE TEST AND EVALUATION SYSTEM

Built an Online Test and Evaluation System that automates exams and improves security, allowing easy test creation, management, and result evaluation using **PHP, JavaScript, HTML, CSS**, and **MySQL**.

BIOMETRIC ATTENDANCE SYSTEM

Developed a Biometric Attendance System with **IoT-enabled fingerprint** scanners for real-time attendance tracking, web-based monitoring, and automated report generation using **PHP, JavaScript, HTML, CSS**, and **MySQL**.

TRACKMYBUS WEB SYSTEM

Built a real-time bus tracking website with **GPS/IoT integration**, interactive maps, live bus status, and an admin panel for managing routes, buses, and schedules.
